

Bridging the maintenance gap in your community

BRIDGE STRUCTURES MANAGEMENT

There's a reason Greyleith is the number one choice for managing and maintaining bridges and structural culverts in Eastern Ontario.

- Road Construction
- Road Maintenance
- Aggregates
- Structures
- Site & Land Development
- Asphalt Sales & Paving
- Concrete Supply
- Equipment Rentals
- Shoreline & Breakwater
- Sewer & Watermain
- Oil Field Services
- Drilling & Blasting
- Recycling
- Crushing
- Traffic Control
- Pipeline Integrity Digs
- Mining Services

Your bridges and structural culverts are an important part of the road network that keeps your community connected. Greyleith Limited is Eastern Ontario's trusted choice for managing these vital assets.

When communities and private owners need someone to monitor and maintain their bridges to make sure they meet the highest safety standards, they turn to Greyleith.

Experience in action

Our team currently monitors more than 350 bridges and more than 200 structural culverts in Eastern Ontario. We handle all regular maintenance, scheduled and unscheduled repairs. We also prepare detailed condition reports annually that form the basis for long and short-term maintenance and repair strategies.

Trained to serve you

All of our employees receive comprehensive training and certification in bridge and structural inspection and asset management. They know how to identify hazards, manage risks, perform accurate estimates, and develop strategies to ensure that your bridges can serve your community for decades to come.

Our asset management, maintenance, and repair services include:

- Risk management and hazard inspections
- Asset management and strategy options
- Rehabilitation estimating
- Bridge washing and scaling
- Concrete repair
- Maintaining, repairing, and replacing expansion joints, railings, guardrail, and sidewalks
- Maintaining, repairing, and replacing steel members and bearings
